do_gauss.f95

Page 1/1

```
program do_gauss

print *, gauss(5)
print *, negate(5)

contains

function gauss (n)
integer gauss

gauss = 0

do i = 1, n
    gauss = gauss + i
end do

end function gauss

function negate (n)

integer negate
negate = -n
end function negate

end program do_gauss

! comment:
! this all works
!
! question:
! how to use the functions in a seperate library?
```
