Page 1/1

```
! my fortran lib al wrong but negate
```

```
function dummy (n)  
integer dummy
```

```
dummy = n
```

```
end function dummy
```

```
function gauss (n)  
integer gauss
```

```
gauss = 0
```

```
do i = 1, n  
    gauss = gauss + i  
end do
```

```
end function gauss
```

```
function negate (n)
```

```
integer negate  
negate = -n  
end function negate
```
